Order and Result Code update for QUAD Screens and AFP

Dear Regional Pathology Clients,

On November 7, 2017 a lab alert went out indicating that the QUAD screens and Maternal Serum AFP tests will be sent out to our reference laboratory. We have now developed order codes for interfaced clients so these can be built in their systems. Results for QUAD screens will now be in client EMR's if these order codes are built.

Below are the new order and corresponding result codes. Please deactivate the old order codes QUADOB and AFPO. If you have any questions about these or if you need to test these in your interfaces please contact Andi Hudson at ahudson@unmc.edu. Please also note that the Patient history form found at <http://ltd.aruplab.com/Tests/Pub/0080269> must still be included with the specimens.
